

**The Twenty-Second Report of the Congressional Oversight
Commission**

February 28, 2022

**Commission Members
U.S. Representative French Hill
U.S. Senator Pat Toomey**

TABLE OF CONTENTS

Introduction

Treasury and Federal Reserve Recent Developments

Appendix A: Letters from Commission to Department of Treasury and Department of Defense
Requesting Documents Relating to Communications between their Agencies and
Representatives of Yellow

INTRODUCTION

This is the twenty-second report of the Congressional Oversight Commission (“Commission”) created by the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”).¹ The Commission’s role is to conduct oversight of the implementation of Division A, Title IV, Subtitle A of the CARES Act (“Subtitle A”) by the U.S. Department of the Treasury (“Treasury”) and the Board of Governors of the Federal Reserve System (“Federal Reserve”). Subtitle A provided \$500 billion to the Treasury for lending and other investments “to provide liquidity to eligible businesses, States, and municipalities related to losses incurred as a result of coronavirus.”²

Of this amount, \$46 billion was set aside for the Treasury to provide loans or loan guarantees to certain types of companies. Up to \$25 billion was available for passenger air carriers, eligible businesses certified to inspect, repair, replace, or overhaul services, and ticket agents. Up to \$4 billion was available for cargo air carriers, and \$17 billion was available for businesses “critical to maintaining national security.”³

The CARES Act charges the Commission with submitting regular reports to Congress on:

- The Federal Reserve’s use of its authority under Subtitle A, including the use of contracting authority and administration of the provisions of Subtitle A.
- The impact of loans, loan guarantees, and investments made under Subtitle A on the financial well-being of the U.S. economy.
- The extent to which the information made available on transactions under Subtitle A has contributed to market transparency.
- The effectiveness of loans, loan guarantees, and investments made under Subtitle A in minimizing long-term costs to the taxpayers and maximizing the benefits for taxpayers.⁴

In its first report to Congress on May 18, 2020, the Commission stated that it is responsible for answering two basic questions:

- What are the Treasury and the Federal Reserve doing with \$500 billion of taxpayer money?

¹ CARES Act, Pub. L. No. 116-136, § 4020, 134 Stat. 281 (2020).

² *Id.* § 4003(a).

³ *Id.* § 4003(b). In addition, Division A, Title IV, Subtitle B of the CARES Act (“Subtitle B”) authorized the Treasury to provide up to \$32 billion in financial assistance to passenger air carriers, cargo air carriers, and certain airline industry contractors that must be exclusively used for the continuation of payment of employee wages, salaries, and benefits. Subtitle B is not within the jurisdiction of the Commission.

⁴ *Id.* § 4020.

- Who is that money helping?⁵

The emergency lending facilities established by the Federal Reserve that received CARES Act funds are:

Primary Market Corporate Credit Facility (“PMCCF”) and Secondary Market Corporate Credit Facility (“SMCCF”): Through a special purpose vehicle (“SPV”), the PMCCF enabled the Federal Reserve to purchase newly issued corporate bonds and portions of syndicated loans, and the SMCCF enabled the Federal Reserve to purchase previously issued corporate bonds and exchange-traded funds (“ETFs”) that invest in corporate bonds.⁶ The PMCCF never made any purchases during the period it was operational.⁷ As of September 1, 2021, the SMCCF completed its planned wind down with the SMCCF holding zero ETF securities and zero individual bonds.⁸

Main Street Lending Program (“MSLP”): The MSLP is comprised of five facilities—three dedicated to for-profit businesses and two dedicated to non-profit organizations. The Federal Reserve, through an SPV, acquired loans issued by lenders to small and medium-sized businesses and non-profit organizations with up to 15,000 employees or 2019 revenues of \$5 billion or less. As of February 23, 2022, the Federal Reserve held \$14.7 billion in loan participations purchased under the MSLP.⁹

Municipal Liquidity Facility (“MLF”): The MLF enabled the Federal Reserve, through an SPV, to purchase short-term notes issued by state and local governments. As of February 23, 2022, the MLF had \$3.4 billion in outstanding purchases of municipal notes.¹⁰

The SPV for the SMCCF is the Corporate Credit Facilities LLC. The SPV for the MSLP is MS Facilities LLC. The SPV for the MLF is Municipal Liquidity Facility LLC.

⁹ *Id.*

¹⁰ *Id.*

Term Asset-Backed Securities Loan Facility (“TALF”): The Federal Reserve established TALF to support the flow of credit to consumers and businesses and to generally improve the market conditions for asset-backed securities (“ABS”).¹¹ TALF’s purpose was to enable the issuance of ABS backed by student loans, auto loans, credit card loans, loans guaranteed by the Small Business Administration, leveraged loans, commercial mortgages, and certain other assets.¹² TALF had a total outstanding amount of \$1.3 billion in loans as of February 23, 2022.¹³

The direct lending programs managed by the Treasury that received CARES Act funds are:

Treasury Loans for National Security Businesses: The Treasury had \$17 billion available to make loans to businesses critical to maintaining national security under Subtitle A. The Treasury provided national security loans to eleven businesses, totaling \$735.9 million.¹⁴ One business, Yellow Corporation (“Yellow”), which was formerly known as YRC Worldwide, Inc. (“YRC”), accounted for 95% of the total loans.¹⁵

Treasury Loans for the Airline Industry: In addition, the Treasury had \$29 billion available to make loans to the airline industry under Subtitle A, with \$25 billion available for passenger air carriers, including related businesses, and \$4 billion available for cargo air carriers.¹⁶ The Treasury lent \$21.2 billion across twenty-four such loans to companies the Treasury characterized as airlines, ticket agents, a repair station, and a cargo air carrier.¹⁷

In this report, we provide updates regarding recent key actions taken by the Treasury and the Federal Reserve regarding each of the above lending programs and facilities under Subtitle A, as well as updates regarding the Commission’s oversight activities.

TREASURY AND FEDERAL RESERVE RECENT DEVELOPMENTS

As of January 8, 2021, all emergency lending programs created by the Treasury and the Federal Reserve under Section 4003 of the CARES Act have ceased operations. On December 21, 2020, Congress passed new COVID-relief legislation in the Consolidated Appropriations Act, 2021, Pub. L. No. 115-260. In that legislation, Congress prohibited these Federal Reserve’s CARES Act lending facilities from being restarted or replicated without congressional approval, and it rescinded the remaining unobligated balance of the \$500 billion previously made available under Section 4003 of the CARES Act for emergency lending programs.¹⁸

We summarize below the outstanding amounts of credit extended by each facility and other key developments.

Primary Market Corporate Credit Facility (“PMCCF”)

The PMCCF ceased operations on December 31, 2020. The PMCCF did not engage in any transactions during the period in which it was operational.¹⁹

Secondary Market Corporate Credit Facility (“SMCCF”)

The SMCCF ceased operations on December 31, 2020. As of its closure, the SMCCF invested in 16 bond ETFs with a market value of \$8.8 billion.²⁰ As of its closure, the SMCCF also had purchased individual corporate bonds from 557 different issuers, with the market value of outstanding individual bond holdings totaling \$5.5 billion.²¹ As of September 1, 2021, the SMCCF held zero ETF securities and zero in individual bond purchases.²²

On June 2, 2021, the Federal Reserve announced plans to begin winding down the SMCCF’s portfolio of bond ETFs and individual corporate bonds.²³ On June 10, 2021, the Federal Reserve briefed the Commission on its plan to sell the SMCCF’s holdings. The Federal Reserve noted it intended to take into account daily liquidity and trading conditions for ETFs and

corporate bonds to minimize the potential for any adverse impact on market functioning when executing the planned sales. The Federal Reserve stated its goal was to complete the sale of the SMCCF's assets by December 31, 2021. As of September 1, 2021, SMCCF has completed its planned wind down with the SMCCF holding zero ETF securities and zero individual bonds.²⁴

Main Street Lending Program (“MSLP”)

The MSLP ceased operations on January 8, 2021. The MSLP purchased 1,830 loan participations while it was operational, totaling \$16.6 billion,²⁵ representing 2.8% of its original \$600 billion lending capacity.²⁶ As of January 31, 2022, the MSLP had a balance of \$15.0 billion in loan participations, with an estimated loan loss allowance that decreased to \$2.0 billion, down from previous estimate of \$2.3 billion.²⁷

Every MSLP loan matures in 2025.²⁸ This introduces risk to the taxpayer, as the MSLP will be dependent on market conditions in 2025. To mitigate the above risk, the Federal Reserve monitors credit quality based on borrower information provided to it. The terms of the MSLP participation agreement require the borrower to provide the MSLP with certain financial information quarterly and annually, as well as any material developments. The Federal Reserve, with the assistance of a third-party vendor, reviews and analyzes this information and uses it to develop an internal credit score for MSLP loans. As seen in the table below, the evaluation of loan participations purchased by the MSLP resulted in a loan loss allowance in the amount of \$2.0 billion as of January 31, 2022, equivalent to 13.3% of the \$15.0 billion loan participations' balance.²⁹ As of January 31, 2022, MSLP has recognized approximately \$17 million in loan losses.³⁰ For context, the Small Business Administration's 7(a) Loan Program that targets small businesses has experienced cumulative defaults of 10% to 28% throughout the life of the loans, with loans that were originated in the lead-up to the 2007 financial crisis experiencing 30% to 40% of defaults.³¹

Date as of	Loan Loss Reserve	Portfolio Balance	Loan Loss % of Total Portfolio	Actual Losses
January 31, 2022	\$2.0 billion	\$15.0 billion	13.3%	\$17 million
December 31, 2021	\$2.3 billion	\$15.5 billion	14.9%	\$17 million
September 30, 2021	\$2.5 billion	\$15.9 billion	15.7%	\$12 million
March 31, 2021	\$2.4 billion	\$16.5 billion	14.5%	\$0

Municipal Liquidity Facility (“MLF”)

The MLF ceased operations on December 31, 2020. During its period of operation, the MLF purchased a total of four notes from just two borrowers—the State of Illinois and New York City’s Metropolitan Transportation Authority (“MTA”). These notes totaled \$6.6 billion, representing 1% of the MLF’s original \$500 billion lending capacity.³² As of January 31, 2022, the Federal Reserve held \$3.4 billion of outstanding asset purchases.³³

All of the MLF’s remaining municipal notes mature in 2023, exposing the taxpayer to the risk of market conditions in 2023.³⁴ To mitigate this risk, the Federal Reserve reviews the MLF municipal note investments on a quarterly basis to identify investments that have indications of possible credit impairment. In addition, the Federal Reserve’s modeling of portfolio performance includes an evaluation of the municipal note portfolio performance under stress conditions. As of January 31, 2022, the Federal Reserve does not expect any losses in the MLF portfolio.³⁵

Term Asset-Backed Securities Loan Facility (“TALF”)

TALF ceased operations on December 31, 2020. During its period of operation, the TALF made 224 loans totaling \$4.4 billion to 20 investment funds, representing 4% of TALF’s

³⁴ *Id.*

³⁵ Board of Governors of the Federal Reserve System, *Periodic Report: Update on Outstanding Lending Facilities Authorized by the Board under Section 13(3) of the Federal Reserve Act*, Feb. 10, 2022, <https://www.federalreserve.gov/publications/files/13-3-report-20220211.pdf>.

original \$100 billion lending capacity.³⁶ While TALF only issued \$4.4 billion in loans, improvements in the funding markets allowed \$304 billion in capital to flow to borrowers in the ABS markets in 2020.³⁷

In regards to when TALF loans are scheduled to be repaid, every TALF loan matures in 2023.³⁸ This introduces risk to the taxpayer as the TALF will be dependent on market conditions in 2023. That said, many TALF borrowers have elected to prepay their TALF loans, causing the size of the TALF loan program to contract to a total outstanding amount of \$1.3 billion in loans, as of January 31, 2022.³⁹

To further mitigate taxpayer risk, TALF has recourse to the ABS collateral securing the loan. TALF annual financial statements note that the fair value of the ABS collateral for each TALF loan is subject to both market and credit risk, arising from movements in variables such as interest rates, credit spreads, and the credit quality of the collateral. Lending haircuts applied to each ABS at the time the loan was originated provide a further layer of protection against loss, as the loan amount advanced against each ABS was less than the ABS' value.⁴⁰

The Federal Reserve has indicated that TALF loans are evaluated on a quarterly basis for impairment to determine if the fair value of the collateral is sufficient to repay each loan. Based on evaluations performed as of September 30, 2021, there were no credit impairments in TALF's holdings.⁴¹ The fair value of the collateral is publicly disclosed by the Federal Reserve in its periodic reports to Congress on TALF. Relative to the \$1.3 billion in loans outstanding, the total value of the collateral pledged to secure the TALF loans to eligible borrowers was \$1.5 billion as of January 31, 2022.⁴²

Treasury Loans for National Security Businesses

The national security loan program made 11 loans totaling \$735.9 million.⁴³ As of February 1, 2022, one company has repaid its national security loan and \$749.4 million of loans remain outstanding.⁴⁴ The Commission's eighth report and twelfth report featured in-depth analysis on and recommendations for the program.

The \$700 million loan to Yellow (formerly known as YRC) made up a substantial portion of the program. The Treasury's loan to Yellow contains two parts (i.e., tranches) that mature on September 30, 2024. The first tranche of \$300 million ("tranche A") has an interest rate of London Inter-bank Offered Rate ("LIBOR") +3.50%. Yellow used the funds to cover, among other things, healthcare and pension liabilities, real estate and equipment leases, and interest payments on debt. The second tranche of \$400 million ("tranche B") also has an interest rate of LIBOR +3.50%. Yellow has been using these funds to finance the purchase of tractors and trailers in accordance with the company's capital expenditures plan that must be submitted to, and approved by, the Treasury. The full \$300 million of tranche A of the loan was disbursed during 2020 and the \$400 million tranche B has been disbursed as of July 2021.⁴⁵ As additional security for the Treasury's loan to Yellow, the Treasury received 15.9 million shares of Yellow's common stock as consideration.⁴⁶ Based on Yellow's stock price on February 25, 2022, the value of the Treasury's common stock position is approximately \$149.6 million.

On May 10, 2021, the Commission sent letters to the Secretary of Defense and the Secretary of the Treasury, requesting additional documents regarding the loan made to Yellow. The Commission received a response from the Treasury with copies of the letters of support for Yellow that the Treasury received from members of Congress. The Commission received a letter from the Defense Department in response to the Commission's May 10, 2021 request. On February 28, 2022, the Commission sent letters to the Secretary of Defense and the Secretary of the Treasury requesting additional documents relating to communications between their agencies and representatives of Yellow, including lobbyists. The Commission's letters are attached to this report as Appendix A.

On October 7, 2021, the Commission sent a letter to the Secretary of Defense and the Secretary of the Treasury, requesting information about the status of the eleven loans made under the national security loan program. The Commission received a response from the Treasury on

November 1, 2021 with information relating to the status of the loans and ongoing monitoring of the loan program. Treasury noted that each one of the borrowers is still in business and one of the borrowers, Semahtronix LLC, repaid its loan in full on September 17, 2021. Treasury explained that it requires borrowers to submit data on a quarterly basis as part of its ongoing compliance testing and asset monitoring. As of November 1, 2021, Treasury expected all of the remaining national security loan program borrowers to repay their loans on time and Treasury had no plans to dispose of the loans. The Commission received a letter from the Defense Department dated November 8, 2021 in response to the Commission's October 7, 2021 request.

Treasury Loans for the Airline Industry

The Treasury's airline industry loan program made 24 loans totaling \$21.2 billion but only \$1.9 billion of authorized loans were disbursed.⁴⁷ As of February 1, 2022, nine companies have repaid their loans and \$405.2 million in loans remain outstanding.⁴⁸ The Commission's eleventh report featured in-depth analyses on the program and offered recommendations related to the program.

**Appendix A:
Letters from Commission to Department of Treasury and
Department of Defense Requesting Documents Relating to
Communications between their Agencies and
Representatives of Yellow**

Congressional Oversight Commission

February 28, 2022

The Honorable Janet Yellen
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Ave. NW
Washington, D.C. 20220

Dear Secretary Yellen:

This letter continues the Congressional Oversight Commission's ("the Commission") review of Yellow Corporation ("Yellow"), formerly known as YRC Worldwide, Inc., as a business critical to national security. As you may know, the Commission has been tasked with overseeing the \$454 billion provided to the Treasury's Exchange Stabilization Fund per the Coronavirus Aid, Relief and Economic Security Act ("CARES Act"). Of those funds, \$17 billion was designated to "businesses critical to maintaining national security," of which Yellow received \$700 million.

We continue to have serious concerns with the process the Department of the Treasury and the Department of Defense used to certify Yellow as "critical to maintaining national security", which allowed the company to be eligible for a loan from the Department of the Treasury under Section 4003(b)(3) of the CARES Act. We write to request copies of the following documents:

1. All correspondence including, but not limited to, calls, emails, telephone logs, calendar meeting requests, and all other written correspondence, between the Department of the Treasury and BGR Group regarding Yellow, and its eligibility for a loan under Section 4003(b)(3) of the CARES Act.

These documents are imperative to the Commission's oversight work. Please provide them no later than March 21, 2022. Thank you for your willingness to work and cooperate with the Congressional Oversight Commission.

Sincerely,

/s/
French Hill
Member of Congress

/s/
Pat Toomey
U.S. Senator

Congressional Oversight Commission

February 28, 2022

The Honorable Lloyd J. Austin III
Secretary of Defense
1400 Defense Pentagon
Washington, DC 20301

Dear Secretary Austin:

This letter continues the Congressional Oversight Commission's ("the Commission") review of the Department of Defense's designation of Yellow Corporation ("Yellow"), formerly known as YRC Worldwide, Inc., as a business critical to national security. As you may know, the Commission has been tasked with overseeing the \$454 billion provided to the Department of the Treasury's Exchange Stabilization Fund per the Coronavirus Aid, Relief and Economic Security Act ("CARES Act"). Of those funds, \$17 billion was designated to "businesses critical to maintaining national security," of which Yellow received \$700 million.

We continue to have serious concerns with the process the Department of the Treasury and the Department of Defense used to certify Yellow as "critical to maintaining national security", which allowed the company to be eligible for a loan from the Department of the Treasury under Section 4003(b)(3) of the CARES Act. We write to request copies of the following documents:

1. All correspondence including, but not limited to, calls, emails, telephone logs, calendar meeting requests, and all other written correspondence, between the Department of Defense and BGR Group regarding Yellow, its eligibility for a loan under Section 4003(b)(3) of the CARES Act, and/or the Department of Defense's certification of Yellow as a business "critical to maintaining national security."
2. All information regarding meetings between Yellow CEO Darren Hawkins (or any other representative of Yellow, including registered lobbyists) and Vice Admiral Dee Mewbourne (or any other representative of USTRANSCOM or the Department of Defense) about Yellow's potential certification as a business critical to maintaining national security including, but not limited to, telephone logs, emails, written correspondence, calendar meeting requests, and all other written correspondence.

These documents are imperative to the Commission's oversight work. Please provide them no later than March 21, 2022. Thank you for your willingness to work and cooperate with the Congressional Oversight Commission.

Sincerely,

/s/
French Hill
Member of Congress

/s/
Pat Toomey
U.S. Senator
